tinue working to provide care to the Nicaraguan families.

People who have been receiving Responsible and Careful Care for COVID-19, have frequently had pre-existing conditions such as: arterial hypertension, diabetes mellitus, obesity, heart diseases, immunodeficiency syndrome, chronic kidney failure, a history of cerebrovascular disease, pulmonary tuberculosis and chronic pulmonary diseases.

In the current week, there was **1** death attributable to COVID-19 and other deaths which occurred in people who have been under responsible care, due to pulmonary thromboembolism, diabetes mellitus, acute myocardial infarction, hypertensive crises and bacterial pneumonia.

To date, we have attained the recovery of 7,598 Nicaraguans.

We continue working on prevention and caring for our people, in God's Name!
